

Sophisticated Look and Feel with a New Compact Design

For the consumer who is looking for a stylish printer that can print both photos and documents easily, the iP2700 Series never leaves you hanging.

- FINE Technology and Chromalife100+ system delivers beautiful, long-lasting photos.
- Hybrid Ink System: Pigment-based black ink for crisp, sharp text. Dye-based color inks for smooth, natural photos.
- Collect, combine and edit multiple web pages to print custom layouts using Easy-WebPrint EX.¹
- Use the Auto Photo Fix II software in Easy PhotoPrint EX to adjust and correct your photos.¹

High Quality / Long-lasting Photos

Beautiful grain-free prints: maximum 4800 x 1200 color dpi resolution with droplets as small as 2 picoliters.² Those photos will be preserved for future generations with the ChromaLife100+ system.

FINE Cartridge

Hybrid Ink System

Crisp, sharp text with pigment-based black ink and smooth, natural photos with dye-based color ink.

High Speed, Lab Quality Borderless Photos

Lab quality, borderless 4" x 6" photos are ready to enjoy in approximately 55 seconds.³

Easy-to-Use Software for Web & Photo Printing¹

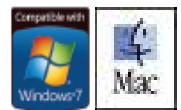

Clip just sections of web pages, then combine them into a single page to print – Easy-WebPrint EX makes it simple. Adjust photos in one step using Auto Photo Fix II, a benefit of Easy-PhotoPrint EX software.

Easy-PhotoPrint EX	Epson Easy Photo Print	No Included Software
Easy-WebPrint EX	Epson Web to Page	HP Smart Web Printing
Connectivity		
Hi-Speed USB	Hi-Speed USB	Hi-Speed USB

1 System requirements vary by application. Easy-WebPrint EX is compatible with Microsoft Internet Explorer 7 and Internet Explorer 8 (32 bit versions only) in Windows 7, Vista or XP only, is not included on installation CD, and requires Internet connection during installation. See www.canontechsupport.com for updated compatibility.

2 Resolution may vary based on printer driver setting. Color ink droplets can be placed with a horizontal pitch of 1/4800 inch at minimum.

3 Photo print speeds are based on the standard mode driver setting using photo test pattern(s) and select Canon Photo Paper. Print speed is measured as soon as first page begins to feed into printer and will vary depending on system configuration, interface, software, document complexity, print mode, types of paper used and page coverage. See www.usa.canon.com/printspeed for additional information. Supported paper types for borderless printing are as follows: Photo Paper Pro Platinum, Photo Paper Pro II, Photo Paper Plus Glossy II, Photo Paper Plus Semi-gloss, Photo Paper Glossy and Matte Photo Paper.

4 Canon cannot guarantee the longevity of prints; results may vary depending on printed image, drying time, display/storage conditions and environmental factors. See www.usa.canon.com/chromaLife100plus for additional information.

5 ISO/IEC 24734, 24735 define the default print and copy speed measurement methods. Print speeds are the averages of ESAT in Office Category Test for the default simplex mode, ISO/IEC 24734, excluding time to print the first set. Copy speed is the average of FCOT, ISO/IEC 24735 Annex D. See our www.usa.canon.com/ipm for additional details.
