

CanoScan® 8800F Color Image Scanner

**Professional Quality and Speed For Photos and Film.
No Warm-up Time.**

- New White LED eliminates warm-up time¹
- FARE Level 3: automatic dust and scratch, fading, graininess and backlight correction
- Seven easy buttons to quickly copy, scan, e-mail or create multi-page PDF documents

No Warm-up Time

The CS8800F will impress you the first time you push the power button. With high-luminance white LED lamps – an industry first – it's ready to scan immediately, with no warm-up time needed.

Scan up to 120 Roll Film

The built-in Film Adapter Unit can scan up to twelve 35mm negatives, four 35mm mounted slides, or four medium format images at one time – either positives or negatives. Multi-scan mode recognizes individual images and opens them as separate files.

Film Automatic Retouching and Enhancement

FARE Level 3.0 handles the most common problems found with old film: it compensates for backlighting to brighten faces; removes dust and scratches; revives faded colors; and reduces graininess.

One-Touch Scanning

Seven easy buttons automate the scanning process, so it's simple to scan, copy and create e-mails and multi-page PDF's.

Auto Image Fix

Auto Image Fix

Enrich your photos with new Auto Image Fix, and faithfully reproduce photo and document quality with advanced copy technology.

Edit and Organize Images and Documents

Adobe® Photoshop® Elements 4.0 is included to enhance, archive and place images in slide shows or e-mails. OCR and page management software is also included to edit and manage documents.

Know Your Customer

If your customer...

- ...wants a film scanner that can work with 120 roll (medium format) film
- ...wants to archive older images, and needs to touch them up
- ...needs high quality and speed, but would like the scanner to be easy to use

... then the CanoScan 8800F Color Image Scanner is the one to recommend.

CanoScan® 8800F Color Image Scanner

Add-On Sales

The Best Input Deserves the Best Output

Add a Canon PIXMA Printer, with Genuine Canon Inks and Photo Papers, for the highest quality prints of scanned images and documents.

Sales Tip!

Emphasize Canon's heritage as a global leader in imaging technology for over 70 years. When you power up the unit for your customer, let them know the white LED technology lets them start scanning immediately – no waiting. Show how the Film Adapter Unit is built right into the lid, and make sure your customer knows the CS8800F can work with 120 roll (medium format film). Point out the stylish design with the easy one-touch buttons, and tell them about the software that comes with the scanner for image and document management, including Adobe® Photoshop® Elements 4.0.

Close the Sale

The stylish CanoScan 8800F blends quality, performance, and ease of use into a stylish design. The Built-In Film Adapter Unit can handle up to 35mm negatives, 35mm mounted slides and 120 roll film. FARE Level 3.0 image correction is included for touch-ups of existing photographs, and batch scanning will save time when archiving images. The seven EZ buttons automate daily functions and software is included for image and document management.
