

**BlackBerry Bold**

The new  **at&t**

## **Transform your BlackBerry Bold smartphone into a tethered modem.**

When using your BlackBerry® Bold™ from AT&T as a modem, you gain the benefits of AT&T's LaptopConnect solution.

- It means you can connect your laptop or desktop computer to the Internet via your BlackBerry smartphone, virtually any time you want to.

The accelerated speeds and extensive nationwide coverage of the AT&T wireless network create breakthrough opportunities for using laptops to enable Wireless Workflow from any location – enhancing the way work flows between people, processes, and systems.

# Use your BlackBerry Bold smartphone as a tethered modem.

To use your BlackBerry® Bold™ smartphone as a tethered modem:

- 1) Ensure you have a Data Connect service plan.
- 2) Download and install the **AT&T Communication Manager** software. Communication Manager runs on your laptop and allows you to control how and when your laptop connects to AT&T's wireless network. It is available free of charge, visit [www.blackberry.com](http://www.blackberry.com)
- 3) Launch Communication Manager. Connect your BlackBerry Bold smartphone to your laptop via USB. If you are using Bluetooth to tether, refer to your Getting Started Guide to find specific information about how to pair your BlackBerry Bold smartphone.
- 4) Click **Connect on the Communication Manager** interface to connect to the AT&T wireless data network.

For more information on tethered modem functionality, visit:
